

My Goal Grades

Well done for watching the *Motivation* video! Now it's time for you to write down what grades you want to get this year!

Why is this SO important?

You could risk not getting the grades you're capable of if you don't have **goal grades** to strive for. It's just like using a bow and arrow if you don't have a target. What are you aiming for?

Your Task

Print out page 2 and **write down what grades you're aiming for** in each subject, and any topics within that subject.

Example

Subject Science
Biology B+ Physics A
Chemistry B Geology A-

Print this page out as many times as you need, and **stick the pages up on a wall where you'll see them all the time!**

Important Tip!

Be ambitious and realistic at the same time.

If English is your best subject, then your goal grades for English should be the highest. If you really struggle with science (for example), going for the best grades might not be very realistic. It might be a good idea to talk these over with your parents.

Whatever you do - make sure your goal grades are going to push you.
